- Cum Laude in Social Communication at Universidad Monteávila 2012-2017

ABOUT ME

I am a passionate and adaptable professional who enjoys creating amazing user experiences and tackling technical challenges. I have taught myself frontend development using HTML, CSS, JavaScript, and ReactJS, one of the most popular frameworks in the industry. I have more than six months of experience developing with ReactJS and using tools like Chrome DevTools to debug and optimize my code.

I also have skills in communication, radio and TV production, audio-visual specialization, and project management. *I have a professional working proficiency in English* and can use systems like Notion, HubSpot, Go High Level and Slack. I am open-minded, detail-oriented, responsible, and confident. I can work independently or in a team, meet deadlines, and learn from others.

WORK EXPERIENCE

- **React Web Developer** 2023 (Current)

Freelance. Developed Personal Projects such as <https://thexo.encolados.com> using React. Freelance website building as well.

- **Tech Support Specialist** On The Fuze 2022-2023

Responsible for onboarding clients and tech support. Used CRM GoHighLevel and Hubspot. Analyzed user experience with Hotjar and Google Analytics and optimized Landing Pages.

- **Wordpress Web Developer** 2020-2022

Freelance. Created Landing Pages and Websites for individuals using Wordpress using plugins such as Elementor Pro. Filmed and edited videos and executed marketing strategies.
