PROFILE

Full-stack developer with 3+ years of experience building AI-native web and mobile applications. Currently developing an AI tutoring platform serving 4 schools across Latin America, featuring Claude-powered agents with tool use, an LLM evaluation workflow (code-based graders + LLM-as-a-judge), SSE streaming, behavioral analytics, and self-service payments. Proven track record shipping production LLM integrations, multi-tenant SaaS architectures, and end-to-end payment flows.

EXPERIENCE

Moddo (EdTech) Remote (Pina Founders)
AI Product Developer April 2026 – Present

- Built full-stack AI tutoring platform (Next.js App Router + T3 Stack + Supabase) serving 4 schools and 29+ students across Latin America, handling 4,200+ real student-tutor conversations.
- Migrated AI engine from OpenAI-compat to native Anthropic Claude SDK with a custom agentic tool loop (Zod-validated tool inputs, iteration caps, self-correction on rejected calls) and prompt caching, achieving ~99% input token savings from the second conversation turn.
- Shipped agentic tool use: the tutor decides through 6 tools when to record evidence of understanding, update topic progress and signal mastery (writing to Postgres). Built a teacher analytics agent with 7 permission-scoped data tools and up to 8 tool rounds per turn, covered by adversarial tests against cross-course data leakage.
- Designed system prompt engineering patterns: evidence-based progress tracking, soft-limit validation (backend recaps, model adapts), and cross-layer synchronization (SSE + backend + LLM).
- Built an LLM evaluation workflow: an E2E multi-turn harness with LLM-simulated students against the live endpoint, an offline harness combining code-based graders (expected tool calls) with LLM-as-a-judge (forced structured output), and SHA-256 prompt versioning. Used it to A/B models and prompts (e.g., rejected a cheaper model that skipped progress tracking). Analyzed 210 conversations across 12 prompt epochs, producing 7 actionable findings.
- Implemented self-service payment: MercadoPago Brick + Alegra electronic invoicing (DIAN) with national and export support for 7+ countries. Added privacy policy, cookie consent, and Meta Pixel + CAPI for ads attribution.
- Created AI-powered course import from Google Docs/PDF into bilingual structured curriculum. Built E2E testing of AI tutor behavior using Playwright MCP with 4 student persona profiles.

Rosa María Álvarez (Real Estate) Remote (Freelance)
AI Automation Developer February 2026 – Present

- Architected AI-powered WhatsApp chatbot for lead qualification using OpenAI behind a provider-agnostic abstraction + WhatsApp Cloud API (Coexistence), feeding into a real-time Kanban CRM (Next.js + Convex).
- Produced social media content strategy and 7 video scripts for premium real estate personal brand in Lima.

Independent Remote
Frontend Developer March 2021 – March 2026

- MCODE (2024–2025): Developed React/Next.js/Tailwind web apps and a Jetpack Compose native app, boosting client workflows 15% in month one; designed Figma UIs for 5+ clients, cutting prototype time 30%.
- Sirvalo Games (2023–2024): Built a cross-platform card game with React Native (Expo), integrated PayPal API for in-app purchases, achieving 500+ downloads in 3 months.
- Club Pyme (Mexico, 2023): Engineered scalable frontend with React + Apollo GraphQL.
- Jausme Startup (2023): Created React Back Office app with REST API, reducing task completion time 15%.

Uberflug Tech Marketing Bogotá, Colombia
VR Tour Developer June 2018 – March 2020

- Developed 360° VR tours for 20+ clients (Homecenter, Hyatt, Arquitectura & Concreto). Managed Homecenter project, nominated for Best Marketing Initiative 2019 by FENALCO.

EDUCATION

Monteávila University Caracas, Venezuela
Bachelor's Degree in Social Communication, Cum Laude Sep 2012 – Jul 2017

SKILLS & LANGUAGES

AI/LLM: Claude SDK (Anthropic), OpenAI API, Tool Use / Agentic Loops, LLM Evals (code graders + LLM-as-a-Judge), Prompt Engineering, Prompt Caching, Structured Outputs (Zod), SSE Streaming, TTS
Frontend: React, Next.js (App Router), TypeScript, Tailwind CSS, React Native (Expo), tRPC, Jotai/Zustand, Figma
Backend: Node.js, Prisma, Supabase, Convex, PostgreSQL, Redis, AWS Lambda/SQS, Google Cloud Run, Vercel
Integrations: MercadoPago, Alegra (DIAN), WhatsApp Cloud API, Meta Business, Resend, PostHog, PayPal
Process: Claude Code, Playwright (E2E), Git, SCRUM/Agile, Notion
Languages: English – C2 (EF SET certified); Spanish – Native
